

MATLAB in Production Systems, Database Integration, and Big Data

Eugene McGoldrick

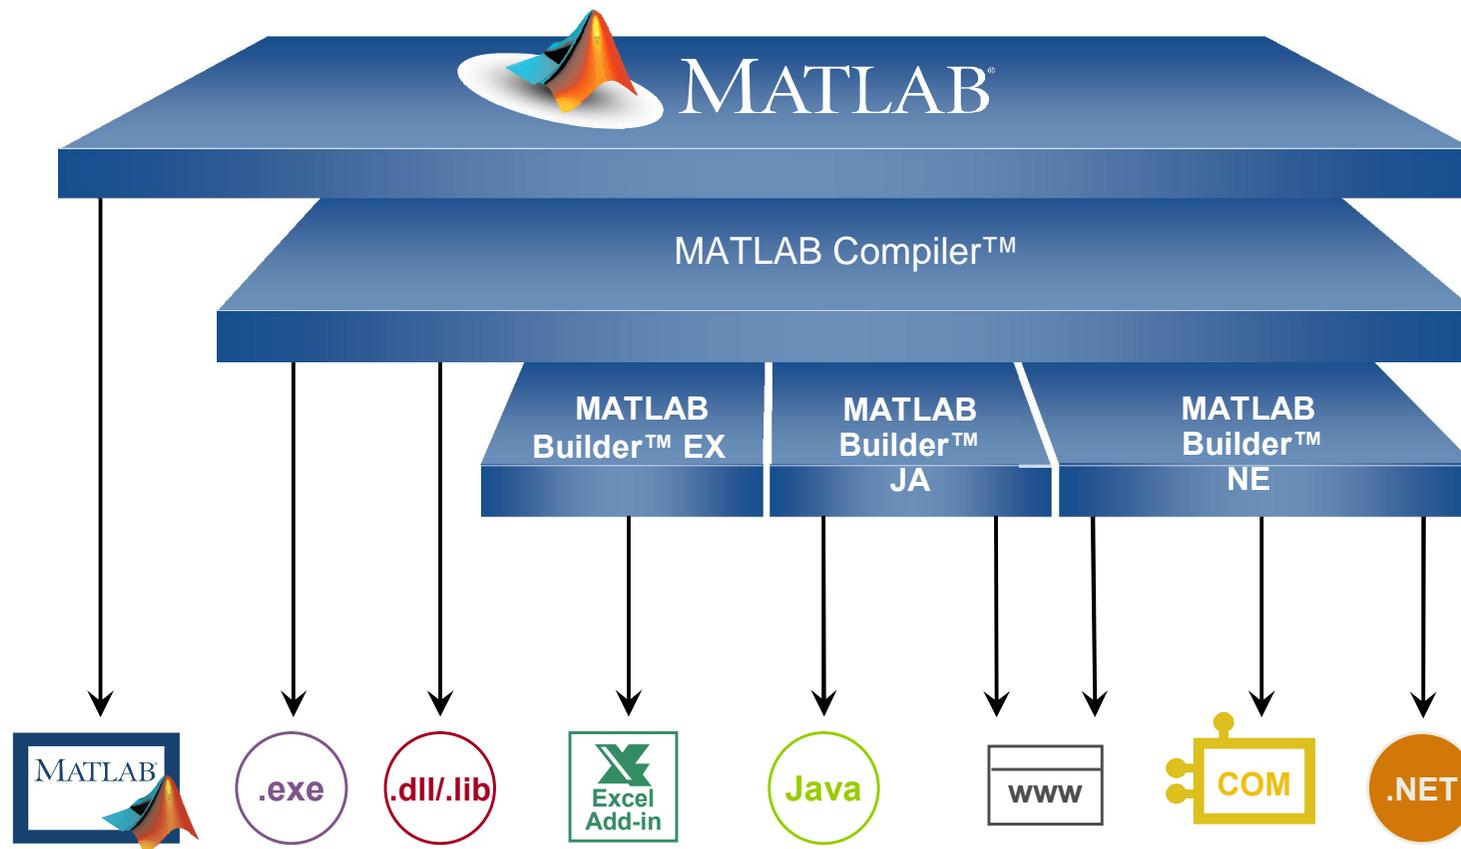

Agenda

- MATLAB Production Server and Excel
- Integrating MATLAB Production Server into Database Servers
- MATLAB Production Server and Web Applications
- MATLAB Production Server based Trading System

MATLAB in the Enterprise

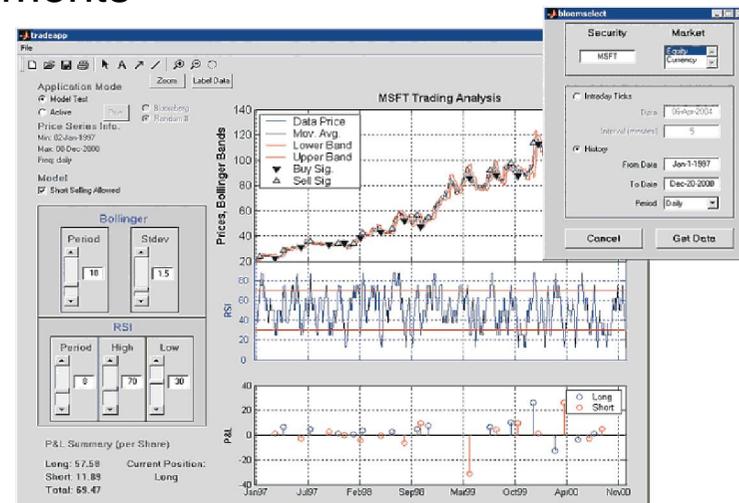

- Goals:
 - Enable customers to rapidly develop and deploy MATLAB applications onto the desktop.
 - Seamlessly integrate MATLAB generated components into other languages, applications and enterprise production systems.

MathWorks Deployment Products

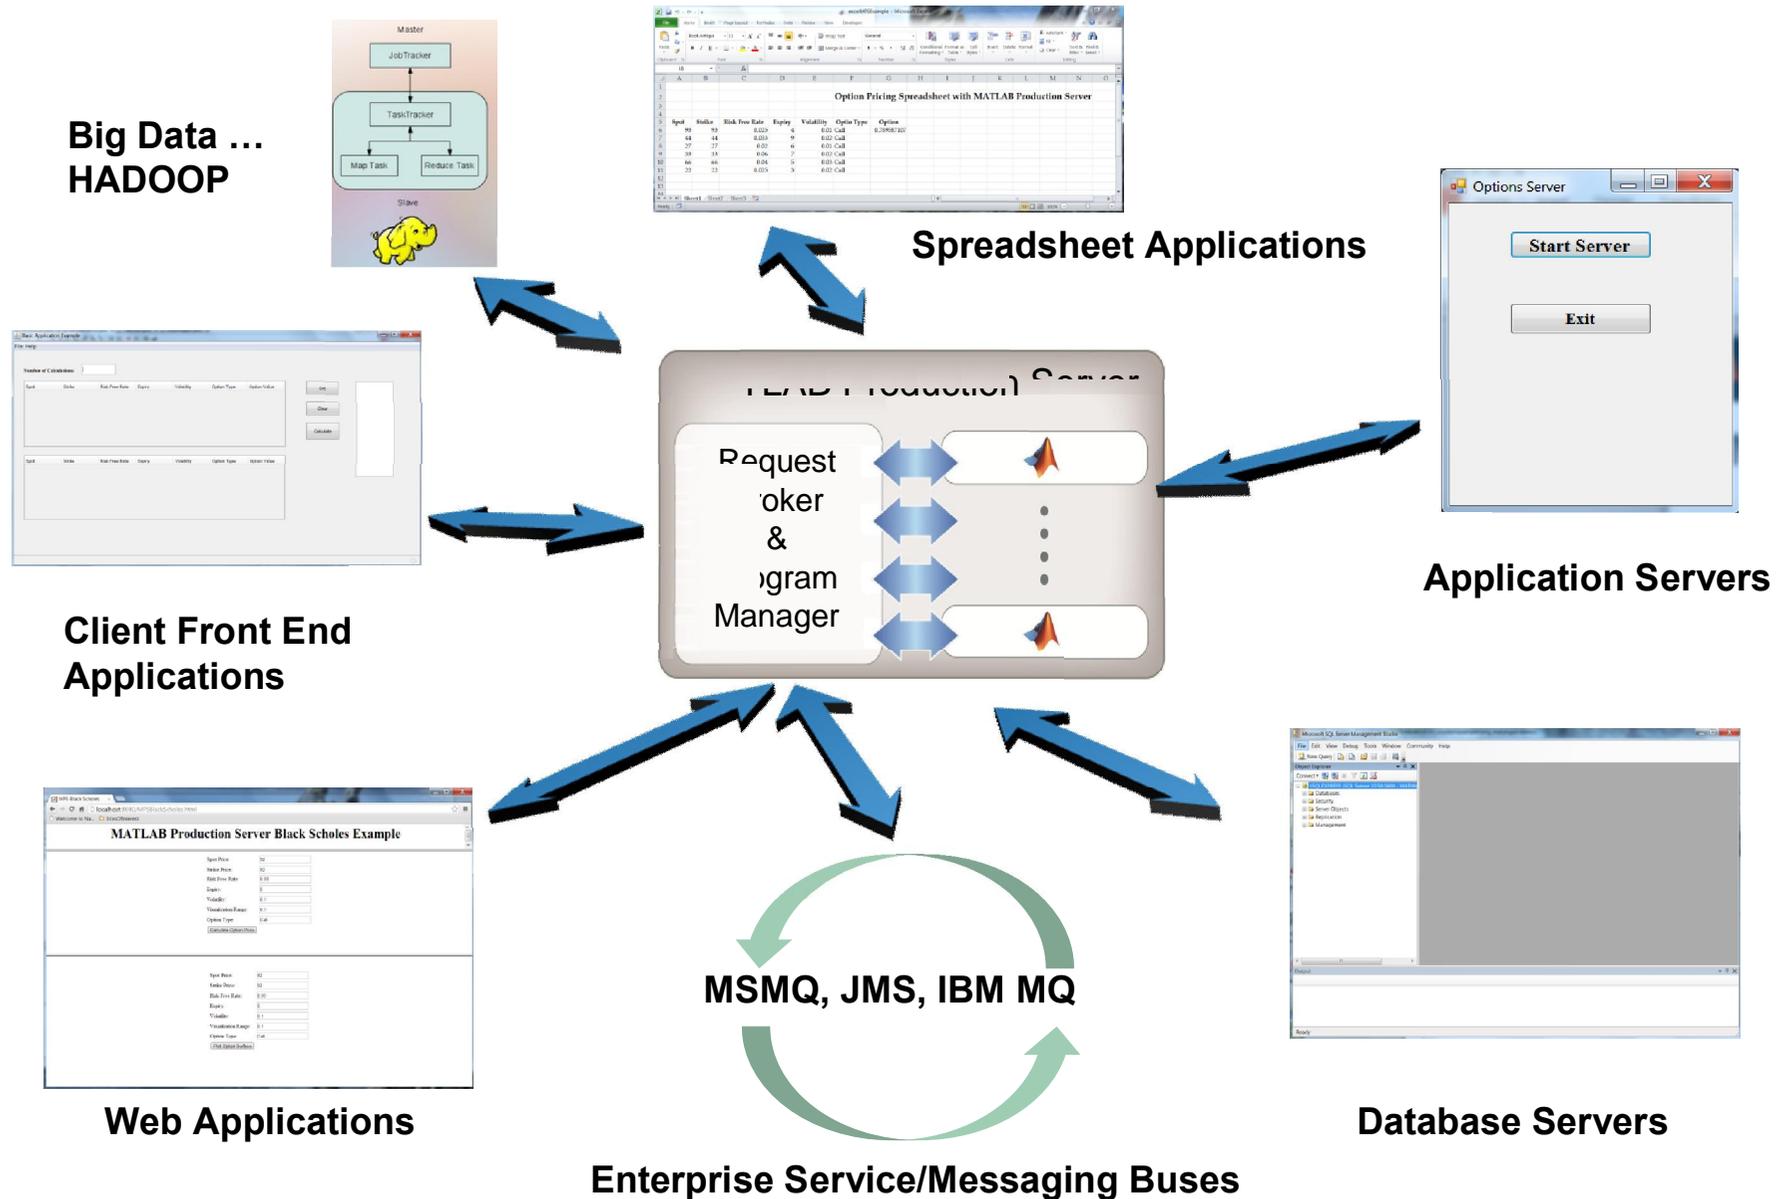

The MATLAB Compiler and Builder Products

- Automatically packages your MATLAB programs as standalone applications, software components, and targeted programming/application environments
 - Executable applications
 - Excel Add-in's
 - .Net and Java components
- Support full MATLAB language and most toolboxes
- Allows royalty-free deployment
- Provides shared infrastructure with MATLAB:
 - *Speed of compiled application equivalent to speed in MATLAB*
- Encrypts your functions

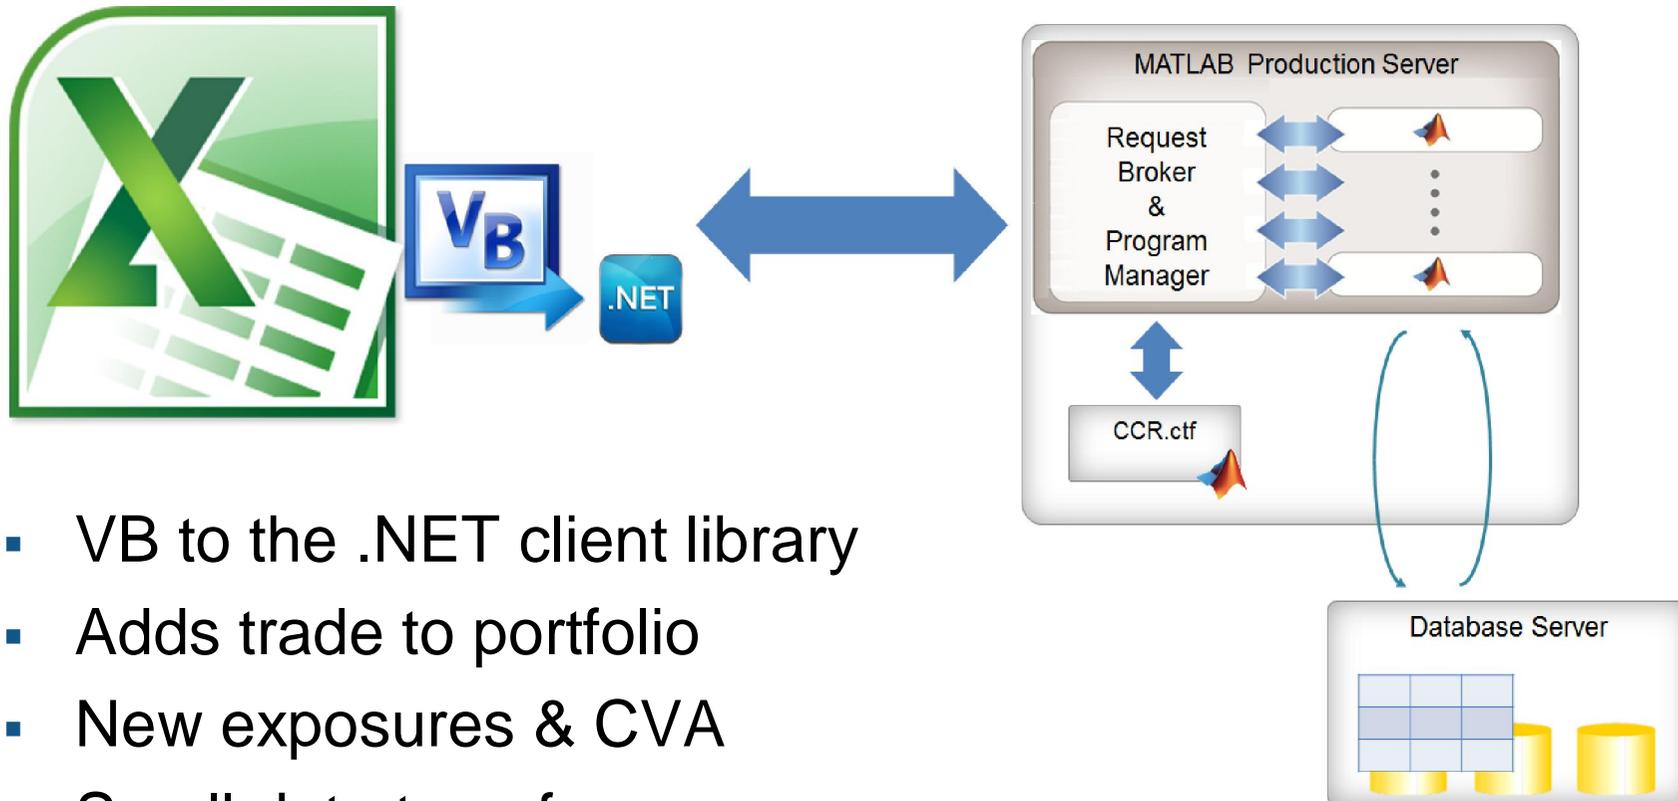

MATLAB Production Server Use Cases

MATLAB Production Server and Excel

Trader: Architecture

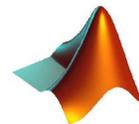

- VB to the .NET client library
- Adds trade to portfolio
- New exposures & CVA
- Small data transfer

Integrating MATLAB Production Server into Database Servers

Workflow for Embedding MATLAB Components in Production Systems

The development to production process is a two step process

- Step 1: Bring Data to MATLAB
 - Multiple data sources
 - Build algorithms/models
 - Test
 - Compile to target platform component
- Step 2: Bring algorithm to the Data
 - Install MATLAB component into the enterprise production applications.
 - Same functionality/single source

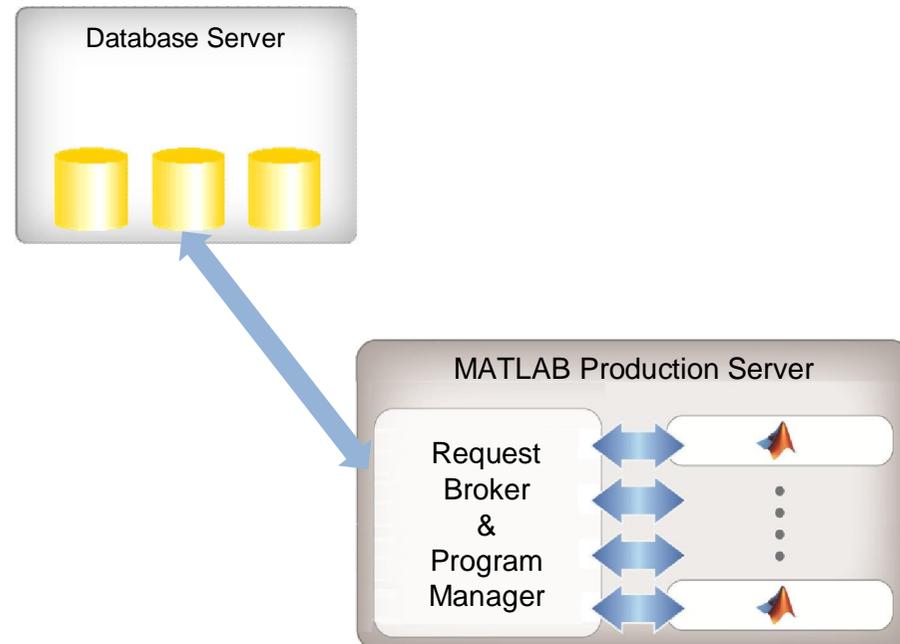

MATLAB Components in Production Databases

MATLAB Production Server can provide predictive analytics in the database

- Oracle (Java, .NET)
- Microsoft SQL Server (.NET)
- Microsoft Access (.NET)
- Netezza (JAVA)
- SAS (JAVA)
- Teradata (JAVA)

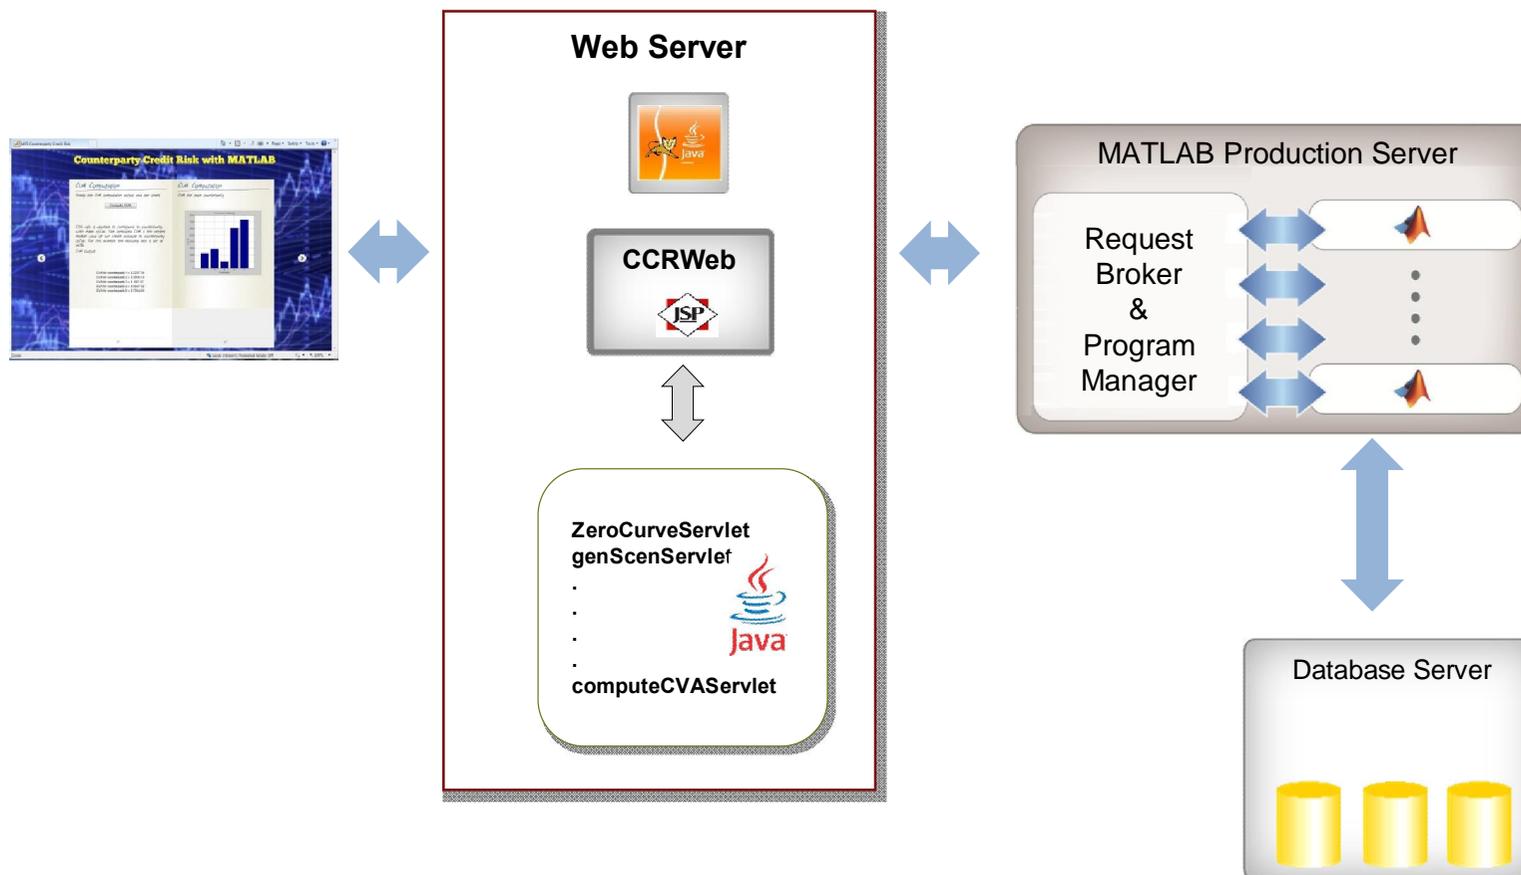

- Thin client with MPS
 - Java and .NET supported
- Central repository for models ... Simplifies change management

MATLAB Production Server and Web Applications

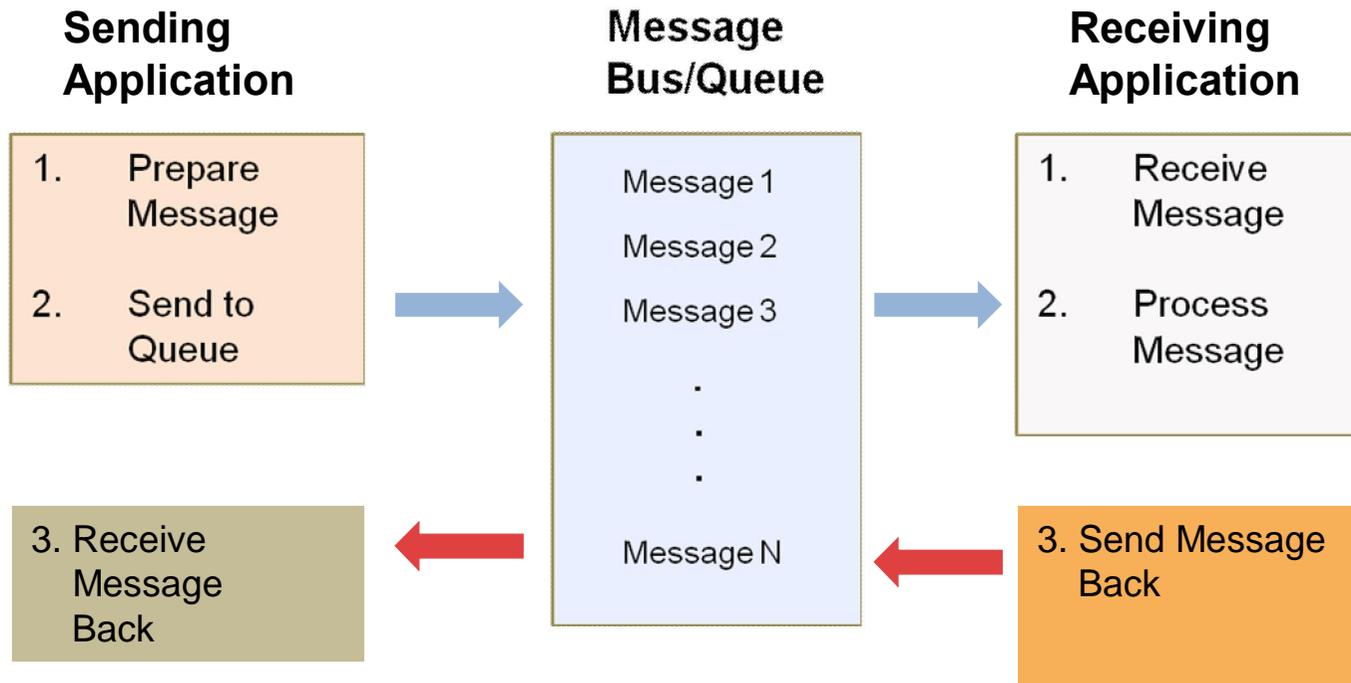

Risk Manager: Architecture

- Architecture

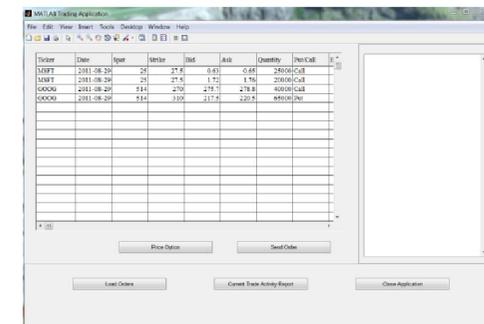

MATLAB Production Server based Trading System

Messaging ... A very brief tutorial!

MATLAB Trading Application (1)

- Made up of many components
- Leverages MATLAB and Deployment Tools to integrate MATLAB analytics into 3rd party applications
- Uses MSMQ as a messaging system to “talk” to other applications

MATLAB Trading Application (2)
